

THE TRADING MENTORSHIP PROSPECTUS

Stop trading noise. Start executing with clarity.

A six-phase development framework connecting market understanding, price action, liquidity, execution, risk and professional review.

MARKETS / MINDSET / MASTERY

Information is abundant. A repeatable process is rare.

Our mentorship turns fragmented trading knowledge into a structured sequence of observation, interpretation, decision and review.

01

Read context first

Study structure, liquidity and price delivery before forming a trade idea.

02

Execute by defined rules

Use confirmation, invalidation and risk criteria instead of impulsive entries.

03

Treat review as a skill

Journal decisions, investigate mistakes and refine a model you can explain.

From reactive trading to an accountable process.

The objective is not a collection of strategies. It is a consistent way to decide what matters, when to act and when to stand aside.

THE RETAIL TRAP

- 01 Switching strategies after losses
- 02 Entering on momentum alone
- 03 Changing rules between trades
- 04 Placing stops without a risk model
- 05 Trusting selective memory

THE AGI APPROACH

- Build one integrated framework for structure, liquidity and points of interest.
- Wait for context, directional bias and appropriate confirmation.
- Follow an explicit sequence: observe, interpret, wait and act.
- Define invalidation, position size and maximum exposure before entry.
- Use records and structured review to evaluate decisions.

01 Market Foundations

Understand the moving parts of the market before trying to interpret a chart.

MODULE 01

The Forex Market

Market participants, central banks and interbank liquidity.

MODULE 02

Market Mechanics

Pips, lot sizes, leverage, margin and spreads.

MODULE 03

Sessions & Timing

Asia, London, New York and changing activity.

MODULE 04

Candle Anatomy

Bodies, wicks, efficiency and price delivery.

MODULE 05

Market Conditions

Identify trending, ranging and transitional conditions.

MODULE 06

Workspace Setup

Create a focused, consistent chart workspace.

AFTER THIS PHASE

Build a foundational market map and explain the mechanics behind a price move.

02 Price Action

Read what price is doing, assess market structure and connect higher and lower timeframes.

ENTRY MODULE 01

Dynamic Supply & Demand

Examine zones in the context of active price movement and order flow.

PRACTICAL FOCUS

Contextual zones

MODULE 02

Patterns & Behaviour

Study expansion, compression and when familiar patterns lose relevance.

PRACTICAL FOCUS

Behaviour before pattern

MODULE 03

Fractal Market Nature

Connect macro structure, internal structure and execution timeframe.

PRACTICAL FOCUS

Multi-timeframe alignment

AFTER THIS PHASE

Describe price behaviour and structure before deciding whether an entry is relevant.

03 Liquidity & Price Delivery

Locate liquidity pools, understand imbalances and connect key areas into a coherent market narrative.

ENTRY 02-03

Liquidity Dynamics

Equal highs/lows, buy-side and sell-side liquidity, and sweeps.

MODULE

Fair Value Gaps

Study displacement, inefficiencies and possible rebalance zones.

ENTRY 04-06

Order Block Architecture

Explore MB, BB, PB, RB and reclaimed-block concepts.

MODULE

Journal & Performance Review

Trade - record - review - identify - improve.

AFTER THIS PHASE

Explain how structure, liquidity, imbalances and points of interest connect.

04 Execution & Confluence

Turn analysis into a repeatable decision sequence, using multiple confirming factors.

ENTRY MODULE 07

CRT & AMD

Apply Candle Range Theory and accumulation/manipulation/distribution concepts.

MODULE

Structure & Price Delivery

Link structure, liquidity events and delivery zones.

MODULE

Daily Bias & Points of Interest

Form a scenario from higher-timeframe context and key levels.

MODULE

Multi-Timeframe Confluence

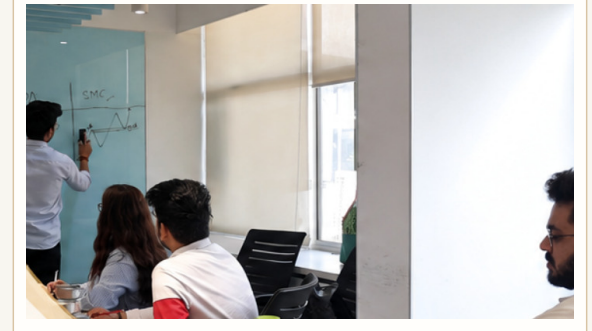

Align structure, liquidity, points of interest and confirmation.

AFTER THIS PHASE

State the setup, required confirmations and reasons for staying out.

05 Professional Trader Development

Build a written trading model around selection, exposure, preparation and review.

MODULE 01

Entry Refinement

Use context and confirmation to evaluate entries.

MODULE 02

Risk Management

Define invalidation, position sizing and exposure.

MODULE 03

When Not to Trade

Identify weak conditions and deliberately pass.

MODULE 04

Weekly Market Profiling

Prepare a structured weekly map of conditions and levels.

MODULE 05

Your Trading Model

Document criteria, risk rules and review protocols.

AFTER THIS PHASE

Work from a written model rather than relying on recall, emotion or impulse.

06 The Execution Lab

An invitation-only stage for examining how analysis and execution hold up in practice.

ADVANCED

Entry Models

Examine advanced conditions and contextual requirements.

ADVANCED

Execution Frameworks

Combine multiple layers of analysis into defined decisions.

ADVANCED

Confirmation

Clarify what must be seen before acting.

ADVANCED

Scalping & Intraday

Review shorter-horizon approaches and trade management.

FEEDBACK

Live Chart Audits

Review charts, execution decisions and areas to improve.

AFTER THIS PHASE

Identify where your actions departed from the model, then define what to refine.

Make every decision easier to explain.

The framework is designed to help you answer six essential questions before, during and after a trade.

01

YOUR MARKET VIEW

What conditions am I seeing?

PHASES 01 / 02 / 04

02

YOUR SETUP

Why does this opportunity fit?

PHASES 02 / 03

03

YOUR ENTRY

What must happen before I act?

PHASES 04 / 05

04

YOUR RISK

Where am I wrong, and what is my risk?

PHASES 05

05

YOUR NO-TRADE RULES

When should I pass?

PHASES 05

06

YOUR REVIEW

Did I follow my plan? What changes?

PHASES 03 / 05

YOUR NEXT STEP

Discuss your mentorship fit.

Request a programme walkthrough and speak with the AGI team.
